A. Smart Cities – Challenges and Strategies

The need for Smart(er) Cities is broadly accepted and gains increasing attention in the public arena

Relevance of the Smart City concept

Google Trend for "Smart City"

Hits for "Smart City" at the research platform Factiva

Comprehensive Smart City Strategies should address infrastructure, fields of citizens life and systematic planning

Elements of Smart City Strategies

Strategic Planning

- > Smart City projects are complex endeavors and need **systematic strategic planning**
- > They have impact on **various urban stakeholders** and require **structured** coordination
- > **Smart City solutions** require **significant investments** and need explicit budgeting
- > Implementation needs to be **organized with clear responsibilities**

Action fields

- > **Education, Government, Mobility, Health, Buildings and Energy** are among the most relevant Smart City action fields
- > Within the action fields **citizens and corporations** experience at first hand the advantages of smart city solutions

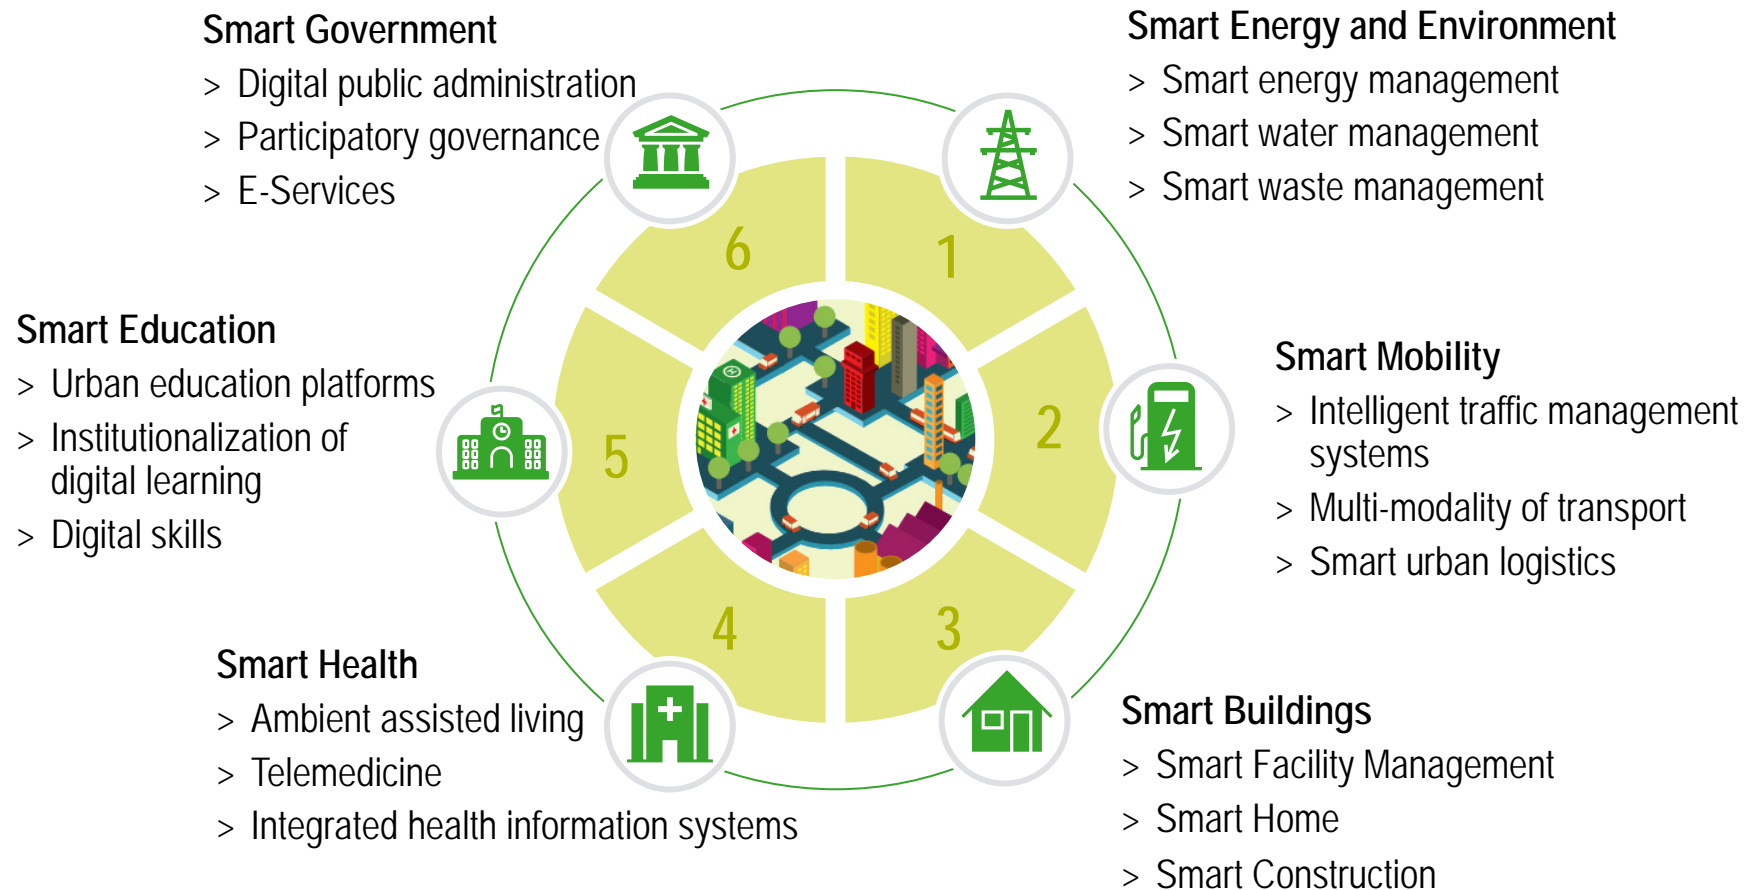

IT-Infrastructure

- > **Smart City infrastructure** must ensure connectivity, accessibility and legal certainty
- > **Internet connectivity** is assured through a the rollout of high-quality broadband network
- > **Legal frameworks** need to be adjusted to a digital worlds needs

Smart City Strategy Action Fields address key aspects of urban life and have impact on growth, well being and the common good

Action Fields of Smart City Strategies

B. Results from the Roland Berger Smart City Strategy Index

For the Smart City Strategy Index, we analyzed 87 Smart City Strategies from all continents and from different city sizes

Regional distribution

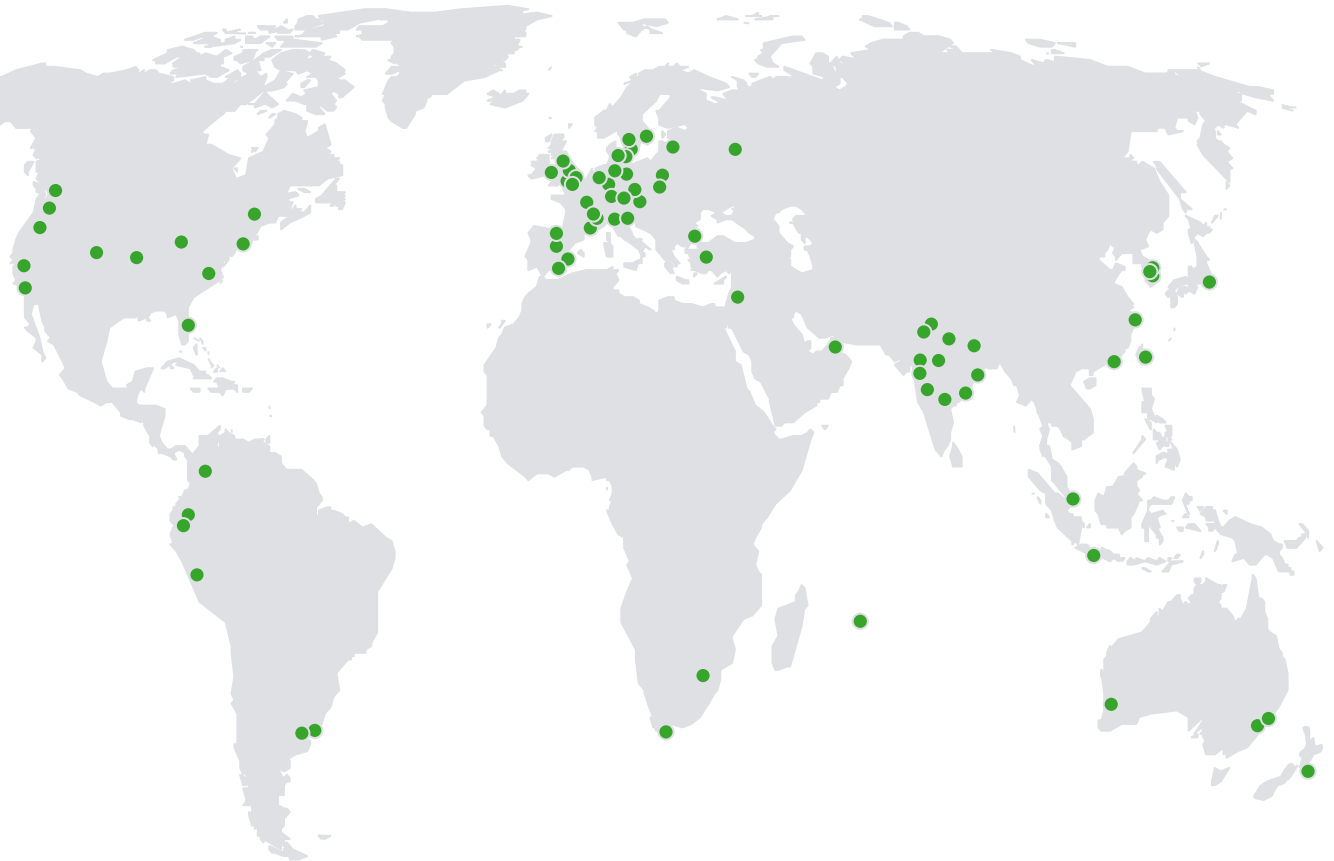

Number of cities from each continent in the sample

Europe	39
Americas	17
Asia-Pacific	26
MEA	5

City sizes

Number of small-, medium- and big cities in the sample

Small cities (up to 500,000)	18
Mid-sized cities (up to 2 m)	39
Big cities (more than 2 m)	30

More and more cities take a strategic approach to become "smart" – strong dynamics since 2014

Published Smart City Strategies per year [#]

- > The examined strategies show a strong **increase** in the number of developed strategies each year since 2012
- > More than half of all strategies have been developed **since 2014**
- > Very few cities have assumed a **pioneering role in the late 2000s**

1) Only first half of 2016

Most Smart City strategies show room for improvement – only 19 cities reach scores > 50

Overview Results SCSI [index]

- > There is **room for improvement** in most strategies – the average score is 37 out of 100
- > The **quality** of the analyzed strategies **differs profoundly** in all three dimensions
- > There is a **sizable quality gap** between the top performers and remaining cities

■ Strategic Planning
 ■ Action Fields
 ■ Infrastructure

Top ranking strategies come from Vienna, Chicago and Singapore – outstanding results in all three categories

Excerpt of results: SCSI for 15 cities [index]

- > High-scoring cities show strong and **balanced results in the three categories**
- > Top-15-cities are located on **four continents**

Most smart city strategies are "narrow" in scope – Emphasis on mobility, energy and administration topics

Excerpt of results: SCSI average results in action fields [index]

- > Scores among action fields **vary strongly**, ranging from less than 20 to over 50
- > **Mobility, government and energy** are addressed best in most strategies
- > **Scores for mobility** are typically above 50
- > Scores in **education, health and buildings** are very low **below 20** points and **drive down the overall scores** for action fields

You do not have to be big to be beautiful – Also smaller cities have created exemplary strategies

Relation of SCSI-Score to City Population

- > Also smaller cities have developed **well-balanced and structured strategies**
- > Shanghai, by far the biggest city in the analysis, is ranked in the last third
- > Santander and Parramatta City have less than 200,000 inhabitants but published top 10 strategies

In general, wealthier cities come up with better strategies – But also cities with lower GDP can create very good strategies

Relation of SCSI-Score to GDP per Capita

- > The economic performance of a city is positively correlated with the Smart City Strategy Index
- > Santander (Spain), Rio de Janeiro (Brazil) and Bhubaneswar (India) show that cities with a mid-field economic background can publish very good strategies as well

C. Best Practice in Smart City Strategies

The SCSI allows to identify best practice in every dimension of the index

Top Smart City Strategies by dimension

 Infrastructure	 Action Fields	 Strategic Planning
1 Vienna 2 Malaga 3 Rio de Janeiro	1 Singapore 2 Vienna 3 Santander	1 Tokyo 2 Chicago 3 Riga
Internet Connectivity Barcelona, Stockholm, New York Infrastructure & Legal Framework Vienna, Malaga, Berlin, Rio de Janeiro	Smart Education Chicago, Vienna, New York, Liverpool Smart Health Aarhus, Santander, London Smart Government Chicago, Cape Town, Stockholm Smart Mobility e.g., Lyon, Seattle, San Francisco, Orlando Smart Energy & Environment e.g., Copenhagen, Ahmedabad, Santander Smart Buildings Malaga, Bristol, Hamburg	Budget Munich, Riga Implementation Seoul, Moscow Target Group & Stakeholders Aarhus, Dublin, Seattle Coordination Los Angeles, Dubai

D. Conclusions and Recommendations

City officials should address **10 key points** when developing Smart City Strategies

1

Reevaluate the **role of the city** and its administration

City officials should address **10 key points** when developing Smart City Strategies

2

Actively Involve citizens, businesses and other stakeholders and **analyze user requirements**

City officials should address **10 key points** when developing Smart City Strategies

The background image shows a man in a dark suit and white shirt, pointing his right index finger towards the viewer. He is positioned in front of a complex digital interface. The interface features several hexagonal icons: a lightbulb (top left), a group of people (top right), a magnifying glass (center), and a pie chart (bottom right). The word "ADMINISTRATION" is prominently displayed in white capital letters on the left side. The background is filled with binary code (0s and 1s) and various digital elements like a globe, a bar chart, and a line graph. The overall color scheme is dark blue and black with white and light blue highlights.

3 Avoid isolated solutions – Look beyond eGovernment and actively apply best practices

City officials should address **10 key points** when developing Smart City Strategies

4

Encourage **self-sustaining business models** and other contributions from the private sector

City officials should address **10 key points** when developing Smart City Strategies

5

Create a comprehensive **data strategy** and establish data **platforms**

City officials should address **10 key points** when developing Smart City Strategies

6

Set up **innovation labs** to foster an inspiring ecosystem

City officials should address **10 key points** when developing Smart City Strategies

7

Ensure data and IT security

City officials should address **10 key points** when developing Smart City Strategies

8

Involve infrastructure operators in designing, financing and implementing initiatives

City officials should address **10 key points** when developing Smart City Strategies

9

Gain political backing and integrate **public feedback**

City officials should address **10 key points** when developing Smart City Strategies

10

Establish a coordinating body and a dedicated **planning system**

City officials should address ten key points when developing Smart City Strategies

- 1 Reevaluate the role of the city and its administration
- 2 Actively Involve citizens, businesses and other stakeholders and analyze user requirements
- 3 Avoid isolated solutions – Look beyond eGovernment and actively apply best practices
- 4 Encourage self-sustaining business models and other contributions from the private sector
- 5 Create a comprehensive data strategy and establish data platforms
- 6 Set up innovation labs to foster an inspiring ecosystem
- 7 Ensure data and IT security
- 8 Involve infrastructure operators in designing, financing and implementing initiatives
- 9 Gain political backing and integrate public feedback
- 10 Establish a coordinating body and a dedicated planning system

Think:Act

navigating complexity

Smart city, smart strategy

Cities around the world are embracing the digital revolution. But how well they are really doing?

C

THE TOP 3 CITIES ARE ON THREE DIFFERENT CONTINENTS

We show who is leading the pack
in terms of their smart city strategy

MORE AND MORE CITIES TAKE A
STRATEGIC APPROACH TO BECOMING
"SMART" – STRONG DYNAMICS
SINCE 2014

TOP 3 BY ACTION FIELD

Cities tend to focus their
efforts on one or more areas
and rarely excel in all.

GOVERNMENT
Chicago
Cape Town
Stockholm

BUILDINGS
Malmö
Tokyo
Dubai

MOBILITY
Singapore
Lyon
San Francisco

ENERGY AND
ENVIRONMENT
Copenhagen
Santander
Singapore

EDUCATION
Chicago
Vienna
Singapore

HEALTH
Singapore
Vienna
Aarhus

IN GENERAL, WEALTHIER CITIES COME UP WITH
BETTER STRATEGIES – BUT EVEN CITIES WITH LOWER
GDP CAN CREATE VERY GOOD STRATEGIES

Relation of Smart City Strategy Index score to GDP per capita (USD '000)
